

connecting to majorair

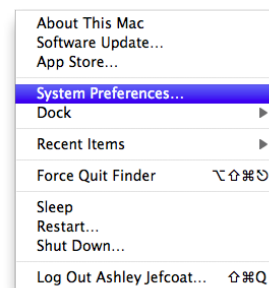

Before you begin, make sure you have installed the latest software updates by **clicking** the *Apple* icon and **clicking** *Software Update...*

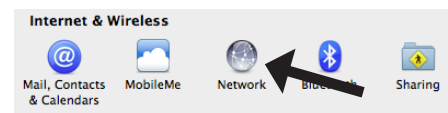

Enabling the Wi-Fi Status Icon

If the *Wi-Fi status icon* is not visible, you will need to enable the icon through the Network Settings using these steps. If the icon is visible, please proceed to the **Connecting to MajorAir** section.

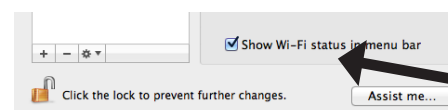

1. **Click** the *Apple* button and **click** *System Preferences...*

2. In the *Internet & Wireless* section, **click** *Network*.

3. **Check** the box next to *Show Wi-Fi status in menu bar*.

4. Close this window, and proceed to the next section: *Connecting to MajorAir*.

Connecting to MajorAir

1. **Click** the *Wi-Fi status icon* and then **click** *MajorAir*. You may have to wait on Wi-Fi to finish scanning for available wireless networks before MajorAir is an option.

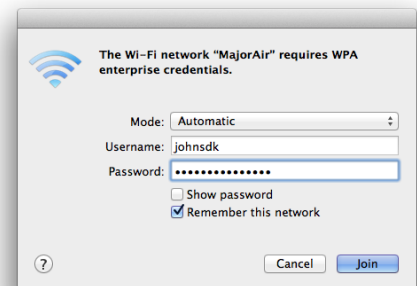

2. In the dialog box that opens, **enter** the following information:

User name: [Millsaps username]

Password: [Millsaps password]

3. **Check** *Remember this network* and **click** *Join*

4. Depending on your settings, you may be asked to enter your log-in name and password. This is not your Millsaps username and password, but rather the administrator username and password you use on your Mac.
5. You should now be connected to MajorAir. Please note that wireless connection speeds can be intermittent, and for the best connection we recommend the wired network connection.
