

connecting to majorair

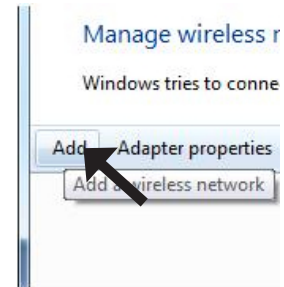

1. Click *Start* | *Control Panel* | *View network status and tasks*.

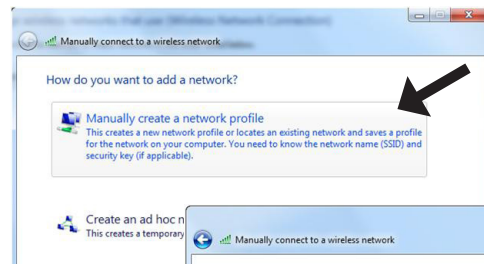

2. Click *Manage wireless networks*.

3. Click *Add*.

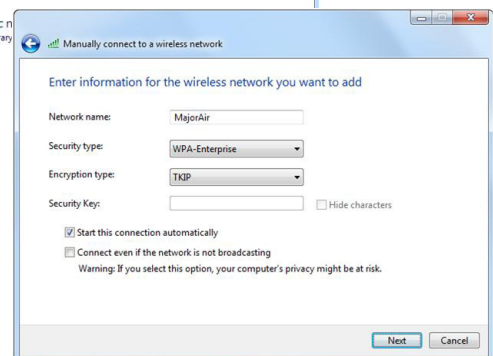

4. Click *Manually create a network profile*.

5. Enter the following information:

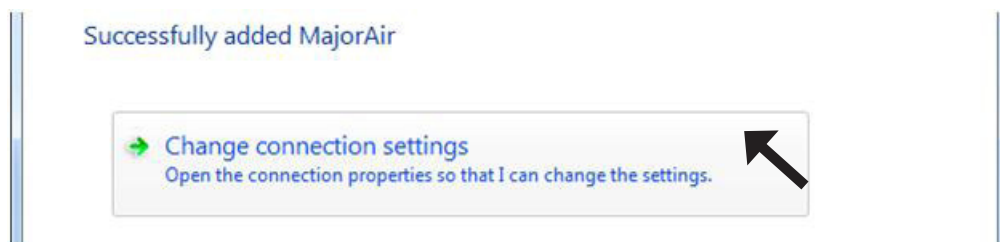

Network name: MajorAir
Security type: WPA-Enterprise
Encryption type: TKIP

6. Click *Next*.

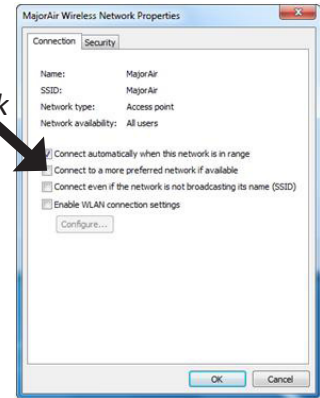

The window should inform you that you have *Successfully added MajorAir* to your computer. However, the connection needs to be configured further before you can connect fully.

7. Click *Change connection settings*.

8. On campus residents should make sure *Connect to more preferred network if available* is **unchecked**. This will prevent accidental connection to the Guest Network.

Off campus residents should make sure *Connect to more preferred network if available* is **checked** in order to connect more quickly to home wireless networks.

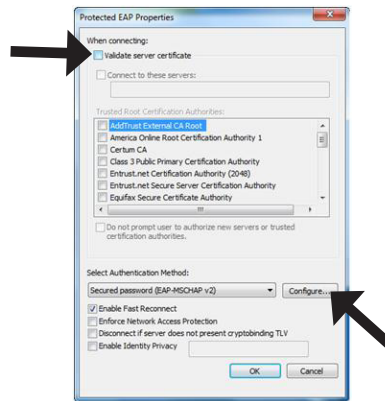

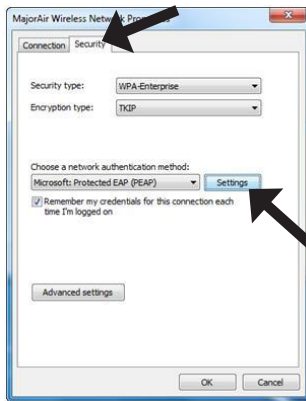

9. Click Security | Settings.

10. Uncheck Validate server certificate. Click Configure

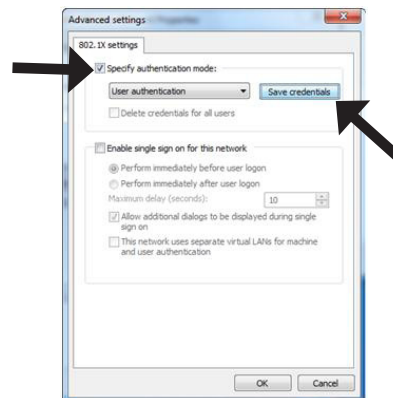

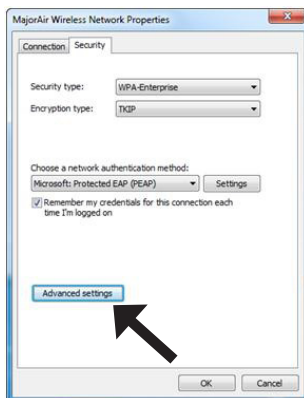

11. Uncheck Automatically use my Windows logon name and password (and domain if any).

12. Click OK | OK.

13. Click Advanced Settings.

14. Check Specify authentication mode. Select User authentication. Click Save credentials.

15. Enter the following information:

User Name: MILNTDOM\Your Millsaps
Username
Password: Your Millsaps Password

16. Click *OK* | *OK* | *Close*.

17. Your computer should now authenticate and connect you to *MajorAir*.
