

Connecting to NOSaints or Media – Mac OS X 10.3.3+

2009 - 2010 | Millsaps College | Information Technology Services

For convenience of our guests we have provided wireless access that has been specifically designed for each group. The **NOSaints** wireless network is designated for the New Orleans Saints community and the **Media** wireless network is designated for media use.

Areas with Wireless Access: As the campus wide wireless plan nears completion areas will continuously be added to the list of active Hotspots. At this point connection to the **NOSaints** and **Media** wireless networks is available in all academic, residential and instructional areas. Connection to the wireless can also be reached in athletic facilities, the Millsaps Bowl, and the Plaza, which is located adjacent to the Student Center and the HAC.

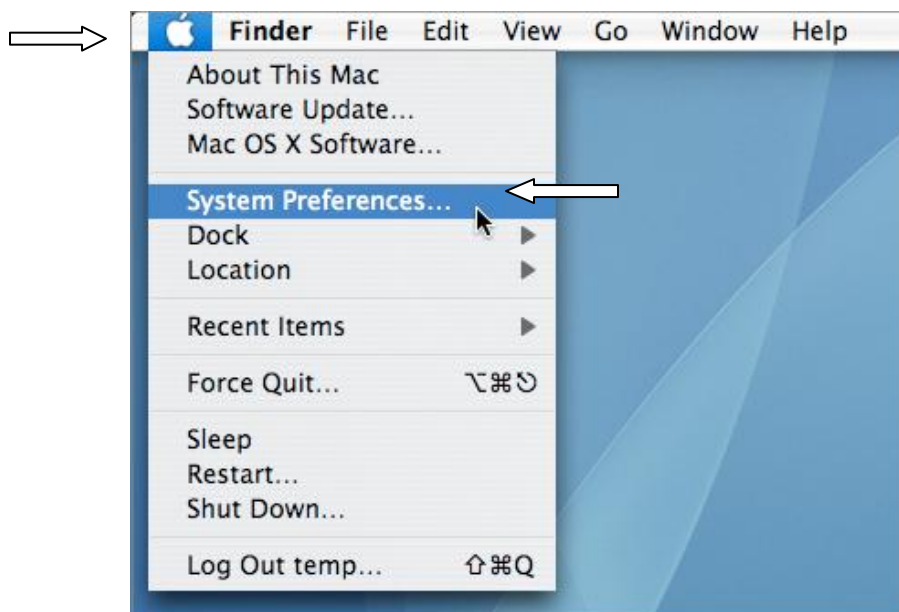

Requirements for Access: You must have a computer equipped with an 802.11b/g-compatible wireless card and the device's latest drivers. The supported encryption type is available only with Macintosh OS X 10.3.3 and greater. The first step may be done anywhere. The last step must be completed while in a wireless enabled area.

Step 1. Enabling your AirPort or other wireless card

Turn on your computer and make sure that the wireless card is activated. To do this **Click** the **AirPort status** icon on the menu bar located at the top. If you see this icon, skip on to **Step 2**.

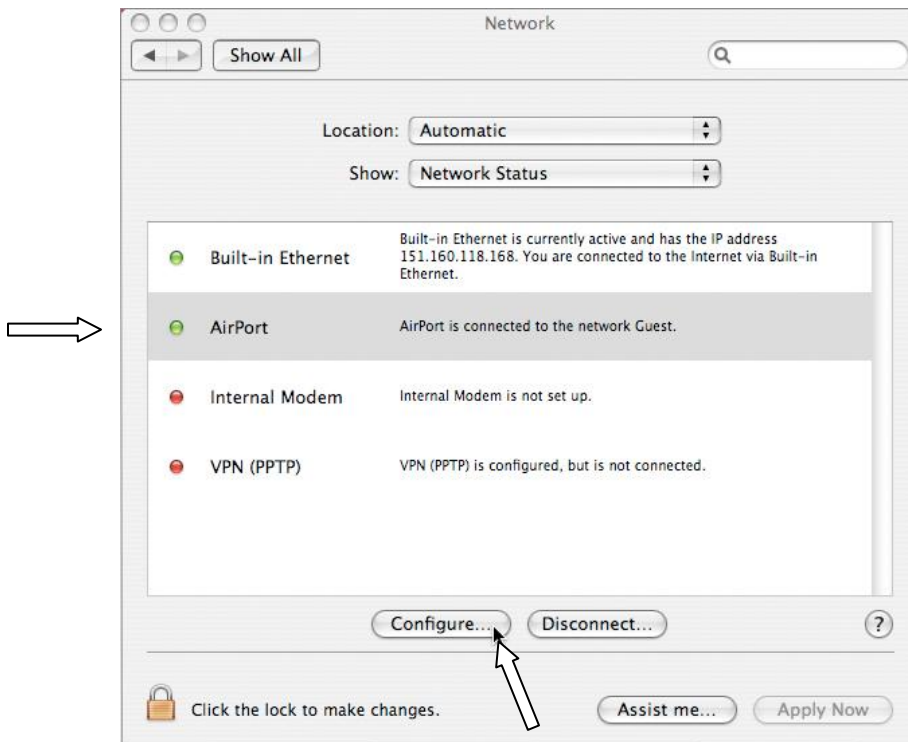

If the AirPort status icon is not on the menu bar **click** the *Apple* icon | **click** *System Preferences...*

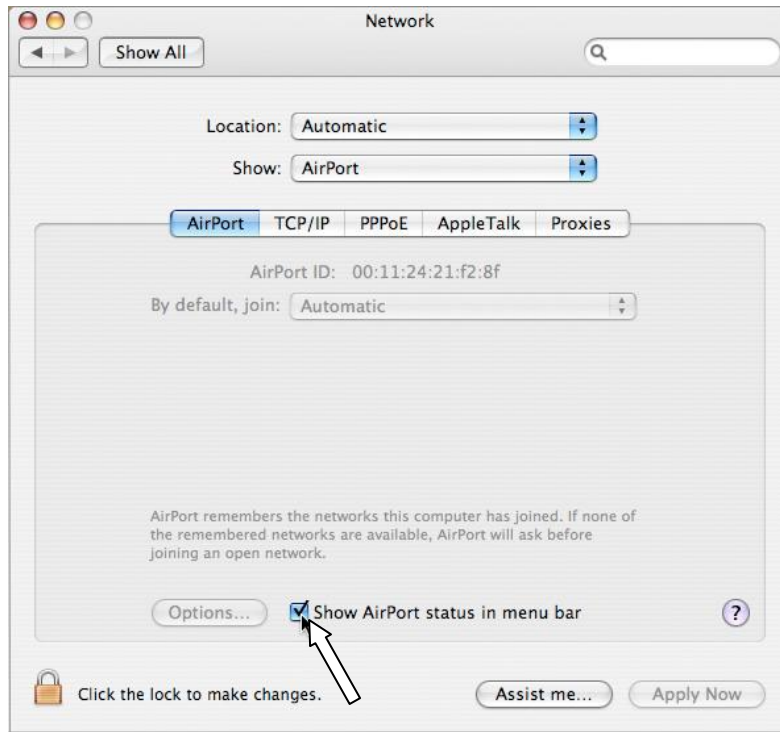

Click *Network* icon.

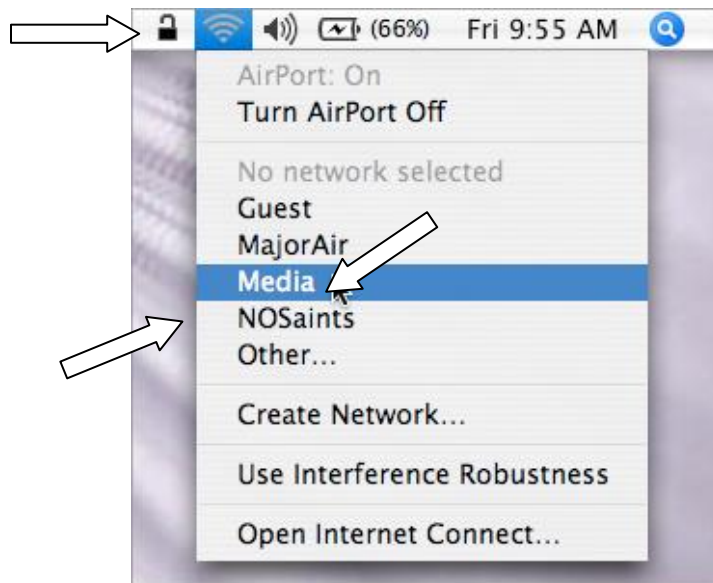

Select *AirPort* | click *Configure...*

Check Show AirPort status in menu bar

Step 2. Connect to Guest network
Click AirPort status | select NOSaints or Media

To authenticate with the **NOSaints** or **Media** network, enter the following information:

Wireless Security: WPA Personal
Password: your assigned password

Then click **OK** to connect to the network.

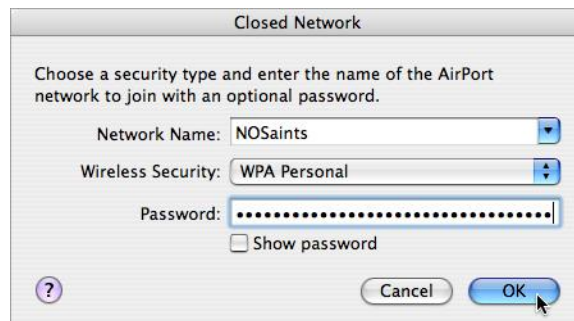

If **NOSaints** or **Media** are not visible in the list, **select Other....**

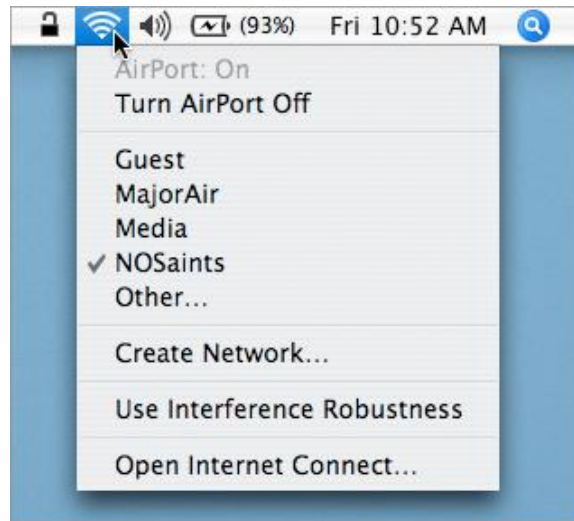

Enter the following information:

Network Name: NOSaints or Media
Wireless Security: WPA Personal
Password: your assigned password

Then **click OK**.

To check your connection status **click** the **AirPort status** icon on the menu bar located at the top. A checkmark indicates that the network is connected.

Please contact Jay Romig at 601-974-1610 for the appropriate WPA passkey. If you have any questions please contact HelpDesk at 601-974-1144, please specify the network you are having problems with.
