How do I get my Lenovo to forget a WIFI network?

- Click the **Network** icon on the lower right corner of the screen. Click **Network** & Internet settings. Click **Wi-Fi** and then click Manage known **networks**. Click the **network** to remove or **delete** under the Manage known **networks** list, then click **Forget**.

How to forget a Wi-Fi network on your iPhone, iPad, iPod touch, or Mac

If you don't want your Apple device to automatically rejoin a network, you can make it forget that network.

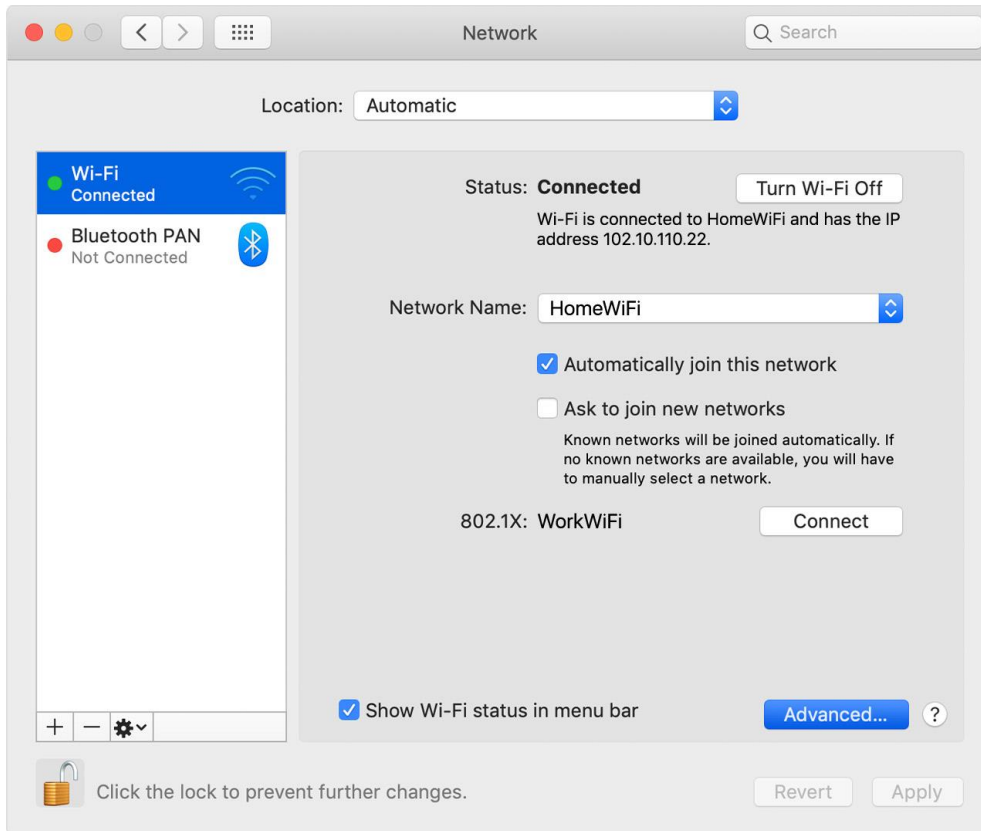

Your Apple device remembers each Wi-Fi network that you joined on that device, and it automatically joins that network again whenever it's in range. If you don't want it to rejoin the network, or you want it to join with a different password, follow these steps to make your device forget that network and its password.

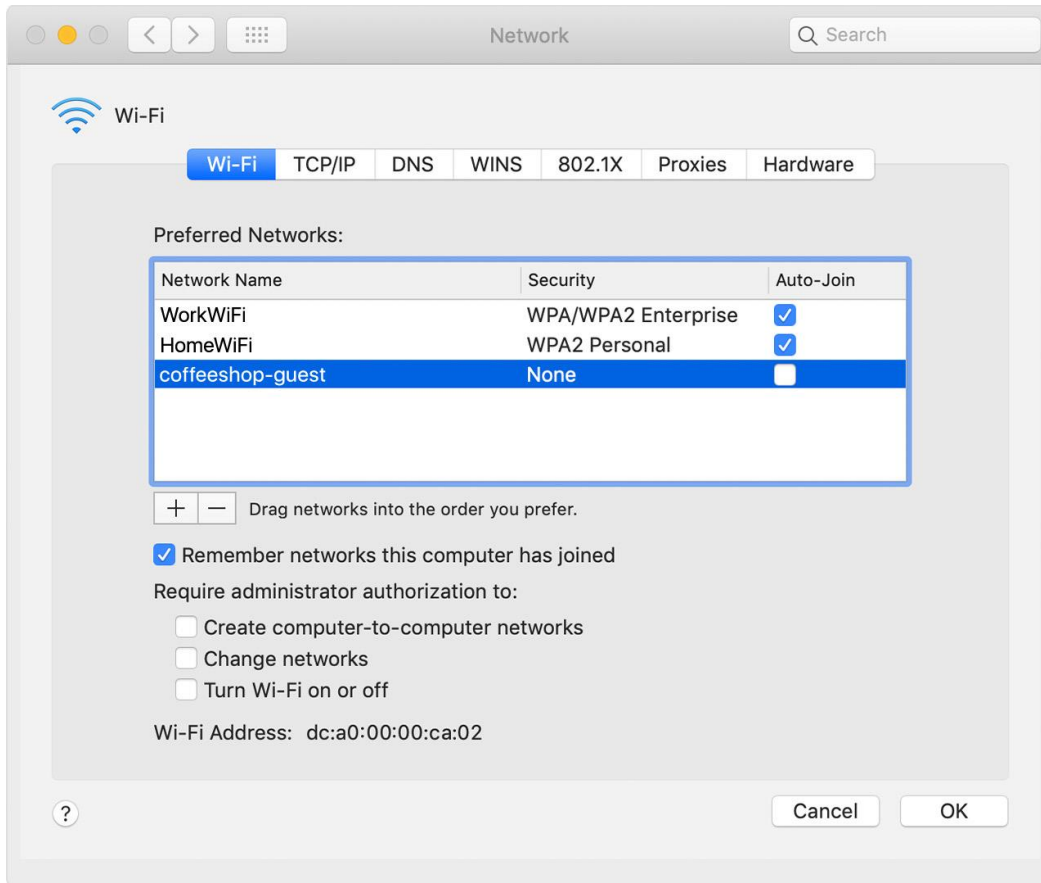

Forget a network on your iPhone, iPad, or iPod touch

- Go to Settings > Wi-Fi.
- Tap ⓘ next to the Wi-Fi network that you want your device to forget.

- Tap Forget This Network, then tap Forget to confirm.
- Forget a network on your Mac
- Choose Apple menu  > System Preferences, then click Network.
- Select Wi-Fi in the list on the left.

- Click the Advanced button.
- The Wi-Fi pane shows a Preferred Networks list. Select the Wi-Fi network that you want your Mac to forget

- Click the remove button (–) beneath the list. If you're asked to confirm, click Remove.
- Click OK.
- Click Apply.
