

## Forticlient VPN

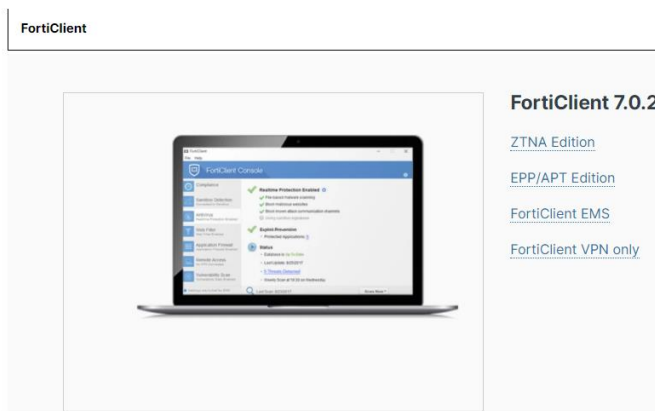

Millsaps VPN is the service that allows individuals to access Millsaps resources like the college file server, and Virtual Applications via a secure, encrypted connection while off campus.

In support of our ongoing effort to better protect personal information, Millsaps VPN requires Multi-Factor Authentication (MFA). When you attempt to sign into Millsaps VPN, you'll be prompted to authenticate using the same Microsoft MFA method for your email and Office365 access.

**Note: (If you previously used a different VPN application, please uninstall that client software first. In addition, please uninstall all previous versions of the FortiClient application prior to installing the latest version.)**

**Product Download** (go here to install the most recent version.)

<https://www.fortinet.com/support/product-downloads>

**Please select the Forticlient VPN only option.**

Select VPN Windows download or VPN for MAC OS.

- Save the FortiClient installer
- Double click on the FortiClient installer to begin the installation
- Select "Yes, I have read and accept the license agreement."

- Check Secure Remote Access SSL and IPsec VPN
- Select “Finish”
- Open Desktop Icon

- Select Remote Access
- Select **Configure VPN**
- New VPN Connection
- Select SSLVPN
- **Connection Name:** Millsaps VPN
- **Description:** <leave blank>
- **Remote Gateway:** vpn.millsaps.edu
- Check Customize port 443
- Check Enable Single Sign On (SSO) for VPN Tunnel
- When prompted, enter your email address and network password to connect

A screenshot of the FortiClient VPN configuration window. The window title is "FortiClient VPN" and it has a menu bar with "File" and "Help". Below the title bar is a blue header with the FortiClient logo and the text "FortiClient VPN". A notification bar below the header says "Upgrade to the full version to access additional features and receive technical support." The main content area is titled "Edit VPN Connection" and has three tabs: "SSL-VPN", "IPsec VPN", and "XML". The "SSL-VPN" tab is selected. The configuration fields are: "Connection Name" (Millsaps VPN), "Description" (empty), and "Remote Gateway" (vpn.millsaps.edu). Below the Remote Gateway field is a "+Add Remote Gateway" button. There are two checked checkboxes: "Customize port" (443) and "Enable Single Sign On (SSO) for VPN Tunnel". At the bottom are "Cancel" and "Save" buttons.
